## Did you know?

Dogs have an incredible sense of smell!

Whether it be used to detect bacon, bombs or missing people, these creatures never fail to amaze us.

Just Dogs is now offering training for dogs to detect dropping sugar levels for people with diabetes, although it is a new venture, we are excited about the possibilities of introducing this amazing service into South Africa! Keep posted to see updates and contact us if you or someone you may know are interested in a medical detection dog.

We will be running fundraisers in the next few months to help support the cause and already have great support from Sanlam for our first dog "Honey"

# Training Tip

"STAY!"

A good stay is important for any dog. It can come in handy in emergency situations and generally around the house. A dog who knows how to stay and can be comfortable doing so, will be more manageable and safer. Just a week ago my own dog got his foot stuck in a metal fence, I was lucky that he understood when I yelled "STAY". He stopped trying to jump and wriggle, turned to me, and waited for me to free him. His manic jumping could have easily resulted in an injury!

Show your dog a treat

Show a big flat palm and say "STAY"

Move your feet on the spot

Reward

Gradually build your dog up one step away at a time so that he understands what stay really means!
